PROFESSIONAL SUMMARY

Versatile and highly adaptive **ICT Professional and Full-Stack Developer** with a comprehensive technical foundation across the entire digital infrastructure lifecycle, seamlessly executing roles from software development to cloud computing. Combining advanced expertise in multi-language programming, enterprise system administration, and secure database management, I leverage strong systems and data analysis capabilities to design, optimize, and troubleshoot complex digital environments. My technical proficiency is anchored by a proactive approach to cybersecurity, technical support, and IT project management. Grounded in strict professional ethics, my technical execution is enhanced by vital interpersonal strengths—including exceptional communication, teamwork, and critical thinking—enabling me to apply efficient time management and rigorous problem-solving to drive infrastructure uptime and deliver scalable software solutions.

EXPERIENCE

ICT Officer & Developer 2021 – Present
Geita Town Council, Tanzania

- Engineered full-stack automation scripts and web applications utilizing Python and modern frameworks to streamline municipal operations.
- Managed enterprise network infrastructure and servers, ensuring 99.9% system availability and optimal technical support execution.
- Optimized relational database architectures for data integrity, performance tuning, and cross-departmental reporting tools.
- Enforced baseline cybersecurity policies, automated system backups, and resolved advanced system administration issues.

Junior Software Engineer (Intern) 2020 – 2021
Tech Solutions Ltd, Tanzania

- Collaborated on building multi-language software applications and API solutions using Python and JavaScript architectures.
- Conducted functional code updates, detailed systems analysis, and performance debugging metrics during staging operations.
- Assisted senior infrastructure engineers with cloud environment maintenance and system deployment configurations.

EDUCATION

BSc in Computer Science

2017 – 2020

University of Dar es Salaam

- Specialized in Software Engineering, Advanced Networking, and Systems Administration models.
